- Swetha K
- Yuvanthika.S

Week 1:(22-27th August 2022)

In week 1 we received mail from IBM career education for onboarding process and we onboarded for the course on time.After few days we received mail regarding the introduction sessions, we attended the introductory sessions regulary and came to know more about this course.On 22nd August 2022 we got access to the resources after we chose the project usecase and we also got approval from the college SPOC.

We all got the access to the guided project workspace and started to know more about our project .Me and team members refered all the guided project template and pre-requisites properly on 24th August .

On the 25th August we registered for the IBM-skillsbuild and we started doing some courses to get the credits. On 26th August, all the members of the team collaborated our Github with the IBM-Project repository through our respective Github usernames. On the 27th August, I received the mail regarding the pre-requisite that needed to be intstalled in the laptop and installed it according to the instructions.

WEEK 2:(29th-3rd September 2022)

On the 29th August we started doing the literature survey on the selected project & we collected the relevant information on project usecase, refered the existing solutions, technical papers, research publications.

On 1st September our first session of project based training started.In that they taught us about the basics of artificial intelligence,Data Science and Deep learning Concepts and they also taught us some basics of python later.
